Continuing Education

The Basics of Conduit Installation - Saturday, October 25, 2025

- This class covers the use of different types of conduit benders and the math necessary to layout and perform 90° bends, offsets, 3-bend saddles, and 4-bend saddles.
- This class will include hands-on labs. Please bring basic hand tools.
- 8 am to 4 pm – 8 hours CEU Industry-Related credit

Load Calculations – Saturday, November 15, 2025

- This class covers the navigation of Article 220 of the NEC as well as calculations related to branch circuits, feeders, and services.
- This class includes sample calculations. Please bring a notebook and a calculator.
- Recommended for those preparing for an Administrator or Master Electrician Exam
- 8 am to 12 pm – 4 hours CEU Code-Related credit

Advanced Conduit Installation – Saturday, November 22, 2025

- This class focuses on accuracy and efficiency when installing multiple conduits on the same rack or in the same space. Basic trigonometry will be covered to assist in calculations. Topics include conduit spacing, parallel offsets, fanning kicked 90's, fanning offsets, segment bending, and concentric bending.
- This class will include hands-on labs. Please bring basic hand tools.
- 8 am to 4 pm – 8 hours CEU Industry-Related credit
